

AKINKUNMI AFODUNRINBI

Data Analyst | Machine Learning | Power BI | SQL | Python
Ibadan, Nigeria | afodunrinbikunmi@gmail.com | [LinkedIn](#) | [GitHub](#) | [Medium](#) | [Portfolio Site](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building end-to-end analytical pipelines across SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis, feature engineering, machine learning, and interactive dashboard development. Demonstrated ability to translate complex datasets into actionable business insights across retail, telecom, public health, and education domains. Certified in Google Data Analytics, Project Management, and Virtual Assistance with a proven track record of delivering data-driven solutions that create measurable business value.

TECHNICAL SKILLS

Data Analysis	SQL (MySQL) Python (pandas, NumPy, Matplotlib, Seaborn, Scikit-learn) Excel (Advanced) Power Query PivotTables Feature Engineering Statistical Analysis
Visualisation	Power BI DAX Measures Data Modelling KPI Dashboard Design Figma
Machine Learning	Logistic Regression Decision Tree Random Forest Churn Prediction Model Evaluation Confusion Matrix Analysis
Tools	MySQL Jupyter Notebook Google Workspace Trello Asana CRM Systems Slack
Soft Skills	Analytical Thinking Attention to Detail Problem Solving Remote Collaboration Continuous Learning

WORK EXPERIENCE

Freelance Virtual Assistant / Data & Sales Operations Specialist | Remote

March 2025 – August 2025

- Designed and maintained operational dashboards in Excel and Power BI tracking sales performance, project milestones, and KPIs across multiple client accounts — reducing manual reporting time by an estimated 30%
- Audited and reconciled CRM records across 3 concurrent client engagements, identifying and resolving data inconsistencies to maintain above 99% data accuracy throughout all active projects
- Mapped and redesigned 4 repetitive client workflows in Asana, implementing automation rules that improved end-to-end task completion efficiency by 20% and eliminated recurring manual bottlenecks

Data Quality Officer | Oneforma (UHRS) / Toloka — Contract

March 2024 – Present

- Reviewed and validated over 500 AI training data tasks per week, maintaining an average quality score of approximately 98% across all assigned projects — consistently ranking among top performers
- Applied structured annotation guidelines to evaluate text data entries for accuracy, relevance, and contextual consistency, ensuring outputs met client-defined quality thresholds before final submission
- Conducted systematic audits of completed task batches to detect labeling errors and flag non-compliant entries — reducing downstream error rates and improving overall dataset quality

Public Health Coordinator | Folarin Dalley International College, Abeokuta — NYSC

March 2024 – October 2024

- Delivered structured mathematics lessons to secondary school students across multiple class levels, developing differentiated lesson plans that improved student engagement and comprehension of core concepts
- Designed and led a school-wide public health awareness campaign covering hygiene, sanitation, and waterborne disease prevention — directly aligned with final year research on WASH and Soil-Transmitted Helminths
- Coordinated with school management and fellow corps members to organise community outreach events, expanding health education reach to parents and local community members

Data & Research Assistant | *International Livestock Research Institute (ILRI), Ibadan* — Intern
November 2020 – January 2021

- ▶ Digitised, reconciled, and validated daily transaction and inventory records across multiple research data streams, achieving a 98% accuracy rate verified through systematic cross-checking protocols
- ▶ Developed and maintained structured spreadsheet templates for inventory tracking and transaction logging, improving data accessibility and reducing retrieval time for the research team
- ▶ Identified and corrected recurring data entry discrepancies before final submission to senior researchers, preventing downstream reporting errors and supporting the integrity of ongoing research outputs

PORTFOLIO PROJECTS

MTN Nigeria Customer Churn Analysis | *SQL · Python · Power BI*

Conducted an end-to-end churn investigation across 974 customer records, engineering features in Python, querying baseline metrics in SQL, and delivering a 4-page interactive Power BI dashboard — identifying ₦58M in lost revenue and flagging ₦83M more at risk from 493 medium-risk active customers through a machine learning churn prediction model.

MTN Nigeria Churn Prediction Model | *Python · Scikit-learn*

Trained and evaluated three classification models — Logistic Regression, Decision Tree, and Random Forest — to predict customer churn. Random Forest achieved the strongest results at 72.82% accuracy and 50% churn precision, with full model comparison, confusion matrix analysis, and feature importance evaluation documented.

Global Superstore Sales Analysis | *Excel · Power BI · DAX*

Analysed 51,290 transactional records across a relational 3-table data model spanning 7 global markets and 4 years — uncovering that 52% of all orders were unprofitable and that aggressive discounting was destroying margins across key product lines and loss-making markets, resulting in 3 actionable business recommendations.
